Who is the user?:

people who listen to records. Me.

Which system or systems are connected to the interface?:

A system of playing a record? The abilities the record player has.

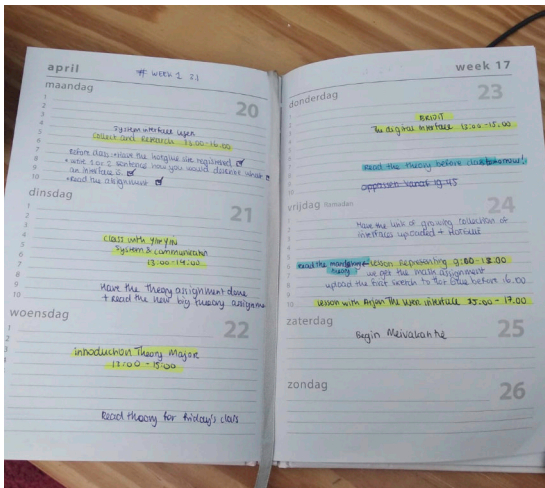

How does the interface affect the user?:

you can hear music being played. You can think about that music. You can become nostalgic.

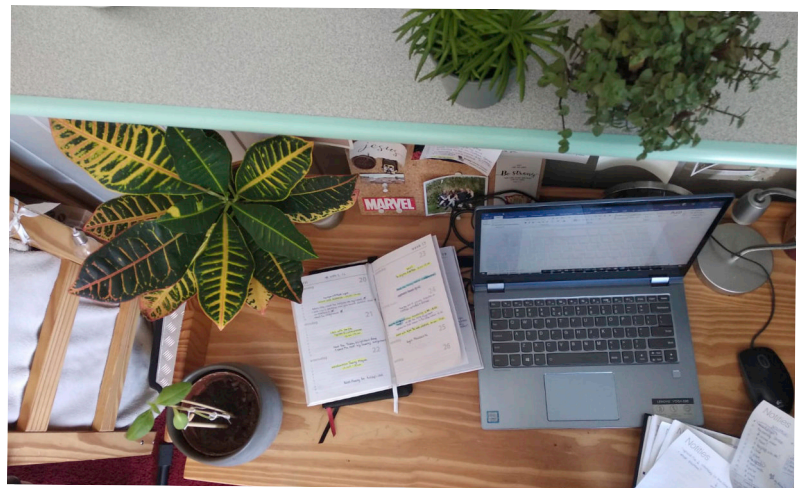

You can experience enjoyment but also the different emotions that can be felt with different songs. The user listens to it. A user has to turn the record and perform actions to turn the record player on and put the record arm on the record. You have to stay in close proximity of the record player.

How can the user interact with the interface?:

You can listen to music by putting a record on it. You have to press certain buttons and perform some actions to make the record player work and get music from it.

A PAPER PLANNER

Who is the user?: Someone who plans. Who prefers paper planners above digital ones. Me.

Which system or systems are connected to the interface?: A system of scheduling

How does the interface affect the user?: You feel like you are in control. The experience is pleasant for a planner. You experience a bit more rest when you write plans down. It can also affect the user in a bad way if there is too much planned in a day. It reminds the person of his or her plans.

How can the user interact with the interface?: the interface allows you to look forward in time and schedule your days. You interact by writing in it and it tells you what you have wrote.
